Recent Projects

Sunrob Robotics

React, Redux Toolkit, NodeJS, ExpressJS, MongoDB, Cloudinary, SendGrid

An e-commerce website for Sunrob Robotics, a robotic company located in Lappeenranta. The interactive web application offers a range of features to enhance the shopping experience, as well as the admin functionalities to control and manage products, users and website information. Authorisation and authentication implemented to ensure the security of the online store. Furthermore, the email service and more authentication functionalities, including password reset link via email, notifications of order, registration and send new offers through email are currently implemented with SendGrid.

Library Management System

Java, SpringBoot, Hibernate, React, TypeScript, ReduxToolkit, Docker, PostgreSQL

This application allows users to browse through a curated collection of books and authors, enabling them to borrow and return books effortlessly. Users can also create a personalised favourite list to keep track of their preferred reads. For added convenience, the application offers a seamless login experience using Google credentials. Administrators possess the authority to create, edit, and delete books and authors, ensuring the system remains up-to-date and organised.
